FILTER MACHINES FOR EDIBLE FATS & OILS

FILTER AID POWDER

HOLDING & DISPLAY WARMERS

MIES BREADING

... **Mies Breading** is no ordinary breading. It consists of a unique blend of 13 herbs and spices.

... **Mies Breading** provides a light, delicate coating which compliments the flavor of the food.

... The thin coating also reduces oil absorption maintaining your food's original flavor.

... **Mies Breading's** mild seasoning enhances food flavor while sealing in natural juices.

... It's easy to use... **"Just Wet It & Bread It!"**
No marinating or egg wash is required.

... Watch as **Mies Breading** create its own batter.

... Fry, Bake, or Grill – **Mies Breading** is versatile for all your cooking needs. Also use it as a Binding Agent or Thickener.

- Stew

MIES FILTER MACHINES

For Edible Fats & Oils

Regular filtering with a Mies Filtering System will generally extend the life of cooking oil 2 to 3 times....

You'll save money, eliminate taste transfer, and improve food quality.

Various Sizes/Models Available

	G50	G100
Tank Capacity	30-50 lbs.	100-150 lbs.

KARBONAIID XX

A NATURAL DIATOMACEOUS SUBSTANCE

... **Karbonaid XX** will remove most soluble food impurities and soluble fat breakdown products from your cooking oil, which can't be accomplished with filter paper alone. The capacity of filter paper is limited to straining and removal of water from cooking oil.

... **Karbonaid XX** is an inert material with billions of microscopically fine spaces to collect impurities. It's porous nature and unique particle structure allows for the greatest degree of filtration available.

... **Karbonaid XX** is also ideal for scouring and cleaning fryers and cooking vessels.
